Applicant's arguments filed on 8/4/03 have been considered but are moot in view of the new ground(s) of rejection.

Claims 8,9,16,17 have been amended to overcome the 112 (second paragraph) rejections.

Claims 8-20 are pending.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cherukuri ('838).

Cherukuri teaches a product comprising confections and a sugarless coating. Cherukuri teaches a method for applying to the gum center, a sugarless coating consisting of sweeteners such as sorbitol, mannitol (col.2, lines 60-64), from about 0.04 to about 2% of synthetic sweeteners which include cyclamate salts or free saccharin acid (col.3, lines 18-21). Cherukuri teaches that it is known in the art to apply two or more coats of each of the coating syrup and dusting mix in order to build up a desired thickness and coating weight on the gum centers (col.2, lines 14-30). As for the teaching of the product comprising a medicament, Cherukuri teaches that the

comestible to be coated may include medicinals in the form of tablets (col.5, lines 55-60).

Cherukuri does not teach particularly the amount of the product.

However, the particular amount of the coating would be readily determined by one skilled in art through routine experimentation. There is no patentable distinction seen over the prior art of a chewing gum product comprising a gum center and a coating which may include medicinals.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the Cherukuri reference, because Cherukuri teaches a product and a gum center, and a sugarless coating which comprises a medicament. One of ordinary skill in the art would have been motivated to use the Cherukuri reference for the purpose of providing a product containing a medicament.
